NYSIF CLAIM ELIGIBILITY PROCESS

PURPOSE OF CLAIM FILE

The purpose of the Claim Eligibility Process is to ensure that the Pharmacy submits bills for valid NYSIF Carrier Case Numbers (i.e. Claims Numbers) only.

NYSIF shall:

- Create a daily extract of eligible Claims based on the business rules defined by the NYSIF Claims Department. This information will include all additions, modifications and deletions that have occurred since the previous transmission.
- Create this Claims Eligibility file in the form of an ASCII Text file.
- Each line in the file shall not exceed 1500 characters
- Create the ASCII Text file using the NYSIF Claim Eligibility File Layout defined below.
- Name the ASCII Text file using the NYSIF Claim Eligibility File Naming Convention defined below.
- Encrypt the ASCII Text file using pgp encryption methodology.
- Transmit the ASCII Text file using SFTP or SSH connection.
- Transmit the ASCII Text file on a daily basis, the specific time(s) to be determined.

CLAIM ELIGIBILITY PROCESS

NYSIF may require that a data extract from the current PBM be used in lieu of an Initial Claim Eligibility Extract from NYSIF.

In addition to those fields in the Claim Eligibility Extract, the PBM will need to accept and utilize additional fields from the current PBM.

INITIAL CLAIM ELIGIBILITY EXTRACT

1. NYSIF extracts PBM eligible claims from NYSIF database based on NYSIF eligibility rules for an initial load of NYSIF valid claims.
2. Claim eligibility extract file is sent to PBM using SFTP or SSH connection.
3. PBM processes file to create a claim index database for NYSIF.
4. PBM system will scan extract for any rejections in the claimant information file.
5. PBM rejects individual claim records based on PBM rejection rules and creates error report.
6. PBM sends claims error report to NYSIF.
7. Claims Administration will determine if it is necessary for the claim record will be modified in the NYSIF system.
8. NYSIF will not send an eligibility record if the first name, last name, gender, address line 1, date of injury, case unit number or approval status is not available.
9. The date of injury must be a valid date.
10. If NYSIF does not have a claimant's valid date of birth, the default value of 19111111 will be sent in the file.
11. If NYSIF does not have a city for the claimant's address, the default value of "X" will be sent in the file.
12. If NYSIF does not have a state for the claimant's address, the default value of "XX" will be sent in the file.
13. If NYSIF does not have a zip code for the claimant's address, the default value of "90000" will be sent in the file.
14. If there is no effective date, the default value of all spaces will be sent in the file.
15. If there is no drug authorization date, the default value of all zeros will be sent in the file.
16. If the state jurisdiction is not NY, the default value of all spaces will be sent in the file.
17. PBM shall be able to accept multiple claim eligibility files in a day if necessary. In most cases NYSIF will only send one file per day.
18. If NYSIF does not have the claimant's SSN, the default value of 999999999 will be sent in the file.

SUBSEQUENT CLAIM ELIGIBILITY EXTRACT

1. NYSIF nightly scans entire NYSIF claim database for changes in eligibility.
2. Program determines if there are any changes in eligibility.
3. Updates, additions, deletions and duplicates will be extracted based on subsequent file eligibility rules.
4. If there are no changes or updates to PBM claim eligibility, an empty file will be created and sent to PBM using SFTP or SSH connection.
5. Claim eligibility extract file sent to PBM using SFTP or SSH connection.
6. The PBM shall update their claim index of claimant eligibility records appropriately and timely.
7. NYSIF will not send an eligibility record if the first name, last name, gender, address line 1, date of injury, case unit number or approval status is not available.

- a. The date of injury must be a valid date.
- 8. If NYSIF does not a claimant's valid date of birth, the default value of 19111111 will be sent in the file.
