

SHORT FILL PROCESS

SHORT FILL HIGH LEVEL PROCESS

SHORT FILL FILE PROCESSING DIAGRAM

SHORT FILL REQUIREMENTS

The PBM is required to submit a computerized daily short fill file via secure transfer with pharmacy bills for those injured workers of NYSIF policy holders where the bill cannot be matched to an established NYSIF claim. The report is due daily. Issue resolution timeframe: prior to the next scheduled submission.

The PBM is required to submit a computerized weekly short fill aging file via secure transfer with bills previously submitted in the Instant Enrollment/"Short Fill" file that remain unmatched to an established NYSIF claim. In the event there are not records meeting the above criteria, an empty file should be transmitted. The report is due each Monday. Issue resolution timeframe: prior to the next scheduled submission.

(10) (Exclusive to NYSIF) The Offeror must provide an instant enrollment or “short fill” service to injured workers of NYSIF policyholders. This service should allow immediate acceptance by any pharmacy in the Offeror’s Retail Pharmacy Network in order to provide a limited number of cost-effective medication benefits to the injured worker. The Offeror must have a strong implementation plan to ensure that the Programs will be fully functioning on January 1, 2019.

(a) Process

- The injured worker has an accident or condition at work.
- The Employer gives the claimant a “Temporary Prescription Services ID form”:

(Forms should be available in the following languages, with other languages to be possibly added:

- English
  - Spanish
  - Polish
  - Russian
  - Traditional Chinese
  - Korean
  - Italian
  - Haitian-Creole
- The injured worker completes the form.
  - The injured worker submits the form and prescription to the pharmacy.
  - The pharmacy contacts the PBM, which in real time, confirms the policy coverage, and notifies the pharmacy whether the prescription can be filled through the PBM.

Confirmation:

- Injured worker’s employer has a policy with NYSIF.
- Injured worker’s employer is the State of New York:
  - Confirm through NYS “Accident Reporting System (ARS)”
    - ✓ Requires obtaining from DCS on real time basis, and utilizing on real time basis, data from ARS.
  - Confirm through policy number, plus other numbers.
- The pharmacy fills the prescription.
- The pharmacy submits the information electronically to the PBM.
- The PBM sends a “Short Fill File” to NYSIF, daily; and an “Aging File”, weekly.
- NYSIF processes the “Short Fill Report File” and “Aging Bill Report File”.

(b) Programming

- PBM’s current system to handle “Short Fills” as per NYSIF specifications.
- In conjunction with DCS for ARS.
- Create daily “Short Fill Report File”.
- Create weekly “Aging Bill Report File”.
- Create an Error Report File

(c) Forms and Notices:

- “Temporary Prescription Services ID form” (*see pages 7 and 8*)
- Notification to Employers
- Posting

(d) Formulary

- Separate formulary for Short Fill program. Formulary shall include but not be limited

- to HIV medications.
  - Dollar limits
  - Time limits for submissions
  - Refills
- (e) Staffing
- Handle responsibilities of the program, including 24/7/365 coverage.

#### SHORT FILL PROCESS BUSINESS RULES

- NYSIF “Short Fill” can be utilized for the first thirty (30) days after the date of accident.
- Pharmacy can only fill a fourteen (14) day supply when using a “Temporary Prescription Services ID card” or an ARS number.
- PBM must not allow a script to be filled at a pharmacy using a Temporary Prescription Services ID card or ARS number once they have received an eligibility record which is disallowed.
- Claimant must show their “Temporary Prescription Services ID” or give their ARS number.

#### SHORT FILL FILE PROCESS BUSINESS RULES (DAILY/WEEKLY):

- If the Policy # is not missing, but is not a valid policy in our system, then the record shall be written to the NYSIF error report.
- If any required field is blank, then the entire file shall be rejected back to the PBM.
- If there is not one and only one header within the file, then the file shall be rejected.
- If there is not one and only one footer within the file, then the file shall be rejected.
- If each line in the file is not exactly 700 characters long, then the file shall be rejected.
- PBM must correct and resubmit all rejected files in a specific time frame to TBD.
- PMB must send an empty file if there are no records to process in the daily or weekly file.
- Weekly short fill file is also called the aging short fill report.
- The short fill data should remain on the weekly aging report until the PBM has billed NYSIF in a weekly billing file or the PBM has received the claim record in the NYSIF eligibility file.
- The PBM must retain a copy of the Short file card that was shown at the pharmacy. NYSIF may request a copy at any time.
- The PBM must retain a record of the ARS number given at the pharmacy.
