## **IMPORTANT WORKLIST FEATURES!**

- Worklist columns cannot be sorted, as they could be in the previous NYBEAS PeopleSoft version. We have been told that this feature will be restored when we upgrade to PeopleSoft 8.0.
- Some of the column widths displayed on the right side of the screen are abbreviated. To display the entire column, place your cursor on the right hand side of bar next to the column name, which appears in grey at the top of the screen. A black bar with two arrows will appear. Click your mouse and drag the column to the right to adjust to the proper width.
- To access the worklist, double click on worklist name on the right side of the screen.

- Entries contained in the worklist selected will be displayed on the left side of the screen under the worklist name. The right side of the screen displays the details of each entry.
- Double click on the entry to be worked on the right side of the screen. This will take you to the appropriate NYBEAS USE/INQUIRE panel. The actual processing of the entry has not changed.
- Some column headings are abbreviated.
