

2020 EMPIRE PLAN PREVENTIVE CARE COVERAGE CHART

NYSHIP's Empire Plan includes provisions for expanded coverage of preventive health care services in accordance with the federal Patient Protection and Affordable Care Act (PPACA). **These charts summarize preventive services covered with no copayment when received from an Empire Plan participating provider.**¹

NYSHIP
New York State
Health Insurance Program

Children

Yearly preventive care (well-child) visits that include height, weight and body mass index measurements, developmental screenings, behavioral assessments and medical history are covered, as well as the screenings, tests, counseling and vaccines² listed below.

Note: Vaccines administered at a pharmacy are not authorized in New York State for persons under age 18, with the exception of the influenza (flu) vaccine. The influenza vaccine may be administered by pharmacists to persons ages two and older.

Screenings • Tests • Counseling

Please note that the preventive health care services listed above are not recommended for everyone. This chart represents current benefits as of January 1, 2020. Vaccine recommendations change. You and your health care provider should decide what care is most appropriate. For specific benefit coverage details and limitations, refer to your plan documents or call The Empire Plan toll free at 1-877-7-NYSHIP (1-877-769-7447).

Adults

Yearly preventive care physical and well-woman exams are covered, as well as the screenings, tests, counseling and vaccines² listed below. **Note:** Select vaccines administered at a participating pharmacy are covered.*

Screenings • Tests • Counseling

- Cholesterol and lipid screening for adults age 40-75
- Screening for type 2 diabetes in adults age 40-70 who are overweight or obese or who have high blood pressure
- Colorectal cancer screening, including fecal occult blood test, fecal DNA test, sigmoidoscopy and colonoscopy for adults age 50-75 (This includes pre-procedure consultation and any resulting pathology exam or polyp biopsy for the colonoscopy.)
- Screening for depression
- Screening for gonorrhea, chlamydia, syphilis and HIV
- Counseling for sexually transmitted infections (STIs)
- Screening and counseling for alcohol misuse, tobacco use, obesity, diet and nutrition **in a primary care setting**
- Screening for abdominal aortic aneurysm in men age 65-75 who have ever smoked
- Bone density test to screen for osteoporosis for women age 65 and older or women at risk
- Breast cancer screening mammography every one to two years for women, beginning at age 40
- Counseling and evaluation for genetic testing of women for BRCA breast cancer gene
- Annual lung cancer screening for adults age 55-80 based on risk and smoking history
- Counseling women at high risk of breast cancer for chemoprevention
- Screening women for cervical cancer up to age 65, including Pap test
- Prenatal care and screenings including, but not limited to, bacteriuria, hepatitis B, Rh incompatibility, syphilis, gonorrhea, chlamydia
- Screening for gestational diabetes for women after 24 weeks of gestation
- Human papillomavirus DNA testing every three years for women age 30 and older
- Screening and counseling for interpersonal and domestic violence
- For women, all U.S. Food and Drug Administration-approved contraceptive methods and sterilization procedures and patient education and counseling³
- Breastfeeding support, supplies and counseling, including cost for purchase of breastfeeding equipment in conjunction with each birth
- Skin cancer counseling for young adults up to age 25
- Screening for hepatitis C virus (HCV) infection for at-risk individuals or one-time screening for adults born between 1945 and 1965
- Screening for tuberculosis and hepatitis B virus infection for at-risk individuals

Vaccines • Medications

- Hepatitis A; Hepatitis B; Measles, mumps, rubella (MMR); Tetanus, diphtheria, pertussis (Td/Tdap); Varicella (chickenpox); Human papillomavirus (HPV).
- Can be administered in a physician's office or at a participating pharmacy:
 - Influenza (flu)
 - Pneumococcal (pneumonia)
 - Meningococcal (meningitis)
 - Herpes zoster (shingles)⁴
- Certain prescription and over-the-counter medications that are recommended for preventive services without cost sharing and have in effect a rating of "A" or "B" in the current recommendations of the U.S. Preventive Services Task Force (USPSTF). **Note:** When available over-the-counter, USPSTF "A" and "B" rated medications require a prescription order to process without cost sharing.

* Covered preventive immunizations obtained at a CVS Caremark national vaccine network pharmacy will be paid in full and will not require a copayment, subject to age limitations.

²Doses, recommended ages and populations vary.

³Most Level 1 contraceptives covered under The Empire Plan Prescription Drug Program are available without cost-share to enrollees.

⁴Shingrix®: No copayment required for enrollees age 50 and older; Zostavax®: No copayment for enrollees age 60 and older; enrollees ages 55 to 59 are subject to a Level 1, 30-day supply copayment at a network pharmacy or medical copayment at a physician's office.
