How do I use the Formulary?

There are two ways to find your drug on the formulary:

Medical Condition

The formulary starts on page 20. The drugs on this formulary are grouped by therapeutic category and class*. For example, drugs used to treat a heart condition are listed under CARDIOVASCULAR.

If you know what your drug is used for, look for the category name in the list that starts on page 1. Then, look under the class name for your drug.

A drug is listed alphabetically by its brand and generic names in the therapeutic category and class to which it belongs.

*Therapeutic category and class based on Wolters Kluwer Clinical Drug Information, Medi-Span® Electronic Drug FileTM v2.

Alphabetical Listing

If you are not sure what category to look under, look for your drug in the Index that starts on page 325. The Index is an alphabetical list of all the drugs in this document. Both brand-name drugs and generic drugs are in the Index.

Look in the Index and find your drug

Next to your drug, see the page number where you can find coverage information

Turn to the page listed in the Index and find the name of your drug in the first column of the list

If a generic equivalent for a brand name drug is not available on the market or is not covered, the drug will not be listed separately by its generic name.

If a generic equivalent for a brand name drug is both available and covered, the generic drug will be listed separately from the brand name drug in all lowercase italicized letters.

Example: *carvedilol*

Inclusion of a prescription drug on the formulary does not guarantee that your provider will prescribe the drug for a particular medical condition.

This document contains references to brand-name prescription drugs that are trademarks or registered trademarks of pharmaceutical manufacturers. ©2025. All rights reserved.

The formulary that starts on page 20 gives information about the drugs covered by New York State Health Insurance Program. A generic drug is approved by the FDA as having the same active ingredient as the brand-name drug. Generic drugs usually cost less than brand-name drugs but provide the same quality of treatment. Any brand-name drug for which a generic drug becomes available will be designated as a non-preferred drug. When a generic version is available, mandatory generic substitution will apply. In this case, use of a non-preferred product will result in the member paying the applicable non-preferred copayment plus the difference in cost between the brand-name drug and the generic, not to exceed the full retail cost of the drug (Ancillary Charge). However, some generic drugs do not cost less than brand-name drugs and may not be added to your formulary.

The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., LIPITOR). Generic drugs are listed in lowercase italics (e.g., *atorvastatin*). The second column lists the drug level. The leveled format places drugs into levels or levels of cost sharing by the plan member in the following manner:

Level 1: Lowest plan member copayment: **All generic drugs**, including those on this ***Formulary***.

Level 2: Intermediate plan member copayment: Preferred brand-name products on this ***Formulary*** selected for Level 2.

Level 3: Highest plan member copayment: Brand-name products on this ***Formulary*** not selected for Level 2, and all non-preferred brand-name products. In most cases, there will be reasonable alternatives in Level 1 or Level 2 for products found in this highest level.

The information in the Limits column tells you if the formulary has any limits for coverage of your drug. These limits may include:

Oral Oncology Medications: Oral Oncology Medications might not be subject to a copay; refer to your Certificate for plan-specific benefits.

Prior Authorization: A clinical review required to determine coverage under the prescription benefit. The purpose of this requirement is to help to promote the safe, appropriate and cost-effective use of medications.

Quantity Limits: Limits on the quantity of medication that will be covered by the plan over a specified time period. For example, the plan allows up to 16 tablets per 30-day prescription for *sumatriptan 50mg*.

Specialty Guideline Management: A clinical review of specialty medications required to determine coverage under the prescription benefit. The purpose of this requirement is to help to promote the safe, appropriate and cost-effective use of specialty medications. This program may include Specialty Quantity Limits based on FDA dosing guidelines.

$0 Copay ACA Preventive Products: Indicates medications eligible at no cost share for members who meet Affordable Care Act preventive care guidelines. A process is available for coverage of preventive services without cost sharing for members identifying with a gender that differs from the member's sex assigned at birth (e.g. a request for the coverage of contraceptives or primary prevention of breast cancer).
